Education

University of Texas at Dallas — Richardson, TX
Bachelor of Science in Computer Science — *May 2028*

Technical Skills

Languages: Java, C++, Python, C#, TypeScript, JavaScript, Bash, SQL, HTML, CSS
Backend/Systems: Distributed Systems, REST APIs, gRPC, Caching, Queues, Observability, Performance Optimization
Frameworks: React, Flask, PyTorch, LangGraph, Node.js, Next.js, Tailwind CSS
Developer Tools: Git, Docker, MCP, XCode, Azure, VS Code, Visual Studio, Figma

Experience

Software Engineering Intern — May 2026 – Present
LinkedIn — *Mountain View, CA*

- Architecting the core **multi-agent orchestration layer** for **an HR Agent** on LinkedIn's internal **Agentic** platform using **LangGraph**, **Python**, and **gRPC**, coordinating **5+ specialized agent modes** and cutting request routing latency by **25%** via intent classification, **ReAct** tool-calling, and stateful agent-to-agent handoffs.
- Building the **MCP** tool-integration layer connecting agents to **3 enterprise systems** (**Workday**, **SmartRecruiters**, **ServiceNow**), standardizing auth and tool schemas to cut integration time per new tool by **40%**.
- Designing **RAG** retrieval and grounding infrastructure for HR policy responses, improving retrieval relevance by **20%** via optimized chunking/ranking, while adding **SSO/SAML** auth and audit logging across **3 channels**: Teams, Slack, web.

Undergraduate Research Assistant — September 2025 – February 2026
School of Behavioral and Brain Sciences, UT Dallas — *Richardson, TX*

- Processed **50+ hours** of ultrasonic vocalization recordings and **10,000+ audio segments** using **MATLAB**, **Python**, **VocalMat**, and **Avisoft-SASLab Lite**, building pipelines that cut manual preprocessing time by **30%**.
- Generated **30+ publication-ready** visualizations, statistical summaries, and research reports, cutting analysis turnaround by **25%** and speeding comparison of behavioral patterns across groups.

Software Engineering Intern — June 2023 – March 2024
HSK Technologies Inc. — *Newark, NJ*

- Integrated **15+ third-party APIs** and built **5+ automated ETL pipelines** with scheduling and validation, cutting data-ingestion failures by **20%** and improving dashboard reliability.
- Developed **50+ Python automation scripts** for data processing and reporting, saving an estimated **20+ hours/week** of manual work and speeding recurring workflows by **40%**.

Projects

Stride | *Electron, Node.js, Strava API, Anthropic API, Garmin MCP* — July 2026

- Built a **Mac desktop app** that syncs live **Strava** and **Garmin** (via a community **MCP** server) running data into a real-time coaching dashboard, re-tailored by training goal (Fitness/5K/10K/Half), with credentials encrypted locally via macOS Keychain.
- Built an **AI coach** feature using the **Anthropic API** that reasons over grounded, per-athlete run data (pace, HR zones, cadence, recovery) instead of generic advice; used it to cut personal half-marathon time by nearly **1 hour** over 5 months.

EcoFin Carbon | *TypeScript, JavaScript, Tailwind CSS, Gemini, Nessie API, Vite* — October 2025

- Built an **AI-powered** fintech web app that analyzes transaction-level spending and estimates carbon emissions using the **Capital One Nessie API**, helping users understand the environmental impact of their purchases.
- Led frontend development across responsive dashboards, user flows, and AI-generated sustainability insights; won **1st Place HackTX 2025** with Capital One recognition and **$1,000**.

BudgetCents | *Python, Flask, React, Stripe, SQL, Git* — November 2024

- Built a full-stack personal finance application with **Flask**, **React**, Chart.js dashboards, and **Stripe** payment integration, with SQL-backed expense tracking, budgeting, and transaction history.
- Designed interactive analytics dashboards for budget tracking, category breakdowns, and spending insights; won **1st Place HackFin 2024** and **$400**.

Achievements & Interests

- **2x Hackathon Winner**: Won **1st Place HackTX 2025** for EcoFin Carbon and **1st Place HackFin 2024** for BudgetCents, earning over **$1,400** in prizes across fintech, AI, sustainability, and financial analytics projects.
- BPA: Top **3** National Finalist in Business and Stock Simulation, applying financial analysis, market research, business strategy, and investment decision-making skills.
- Interests: FinTech Infrastructure, Backend Engineering, Distributed Systems, Machine Learning, Fitness, Running
