Pravan Gorthy

512-720-2475 | pravangorthy21@gmail.com | linkedin.com/in/pravangorthy | github.com/pravan1

Education

University of Texas at Dallas — Richardson, TX
Bachelor of Science in Computer Science — *May 2028*

Technical Skills

Languages: Python, Java, C, C++, C#, TypeScript, JavaScript, SQL, Swift, Bash, Rust, R, HTML/CSS
Frameworks & Web: React, Next.js, Node.js, Express.js, Spring Boot, FastAPI, Flask, REST APIs, Selenium
AI/ML: PyTorch, TensorFlow, OpenCV, YOLOv8, NumPy, Pandas, Keras, PostgreSQL, MySQL, MongoDB, Redis
Cloud & Technologies: AWS (EC2, S3), Azure, GCP, Docker, Kubernetes, Kafka, Git, Linux, CI/CD, Splunk, GraphQL

Experience

Software Engineering Intern — May 2026 – August 2026
LinkedIn — *Mountain View, CA*

- Architected the core **multi-agent orchestration layer** for **an HR Agent** using **LangGraph**, **Python**, and **gRPC**, coordinating **5+ agent modes** and cutting request routing latency by **25%** via **ReAct** tool-calling and agent handoffs.
- Built the **MCP** tool-integration layer connecting agents to **3 enterprise systems** (Workday, SmartRecruiters, ServiceNow), cutting integration time per tool by **40%**.
- Deployed and scaled the agent platform on **Kubernetes** with **Kafka** event streaming, building **CI/CD** pipelines and **Git**-based workflows to ship the platform to production across **3 channels**: Teams, Slack, web.

Undergraduate Research Assistant — September 2025 – February 2026
School of Behavioral and Brain Sciences, UT Dallas — *Richardson, TX*

- Processed **50+ hours** of vocalization recordings (**10,000+ segments**) using **MATLAB**/**Python**, cutting manual preprocessing time by **30%**.
- Generated **30+ publication-ready** visualizations and research reports, cutting analysis turnaround by **25%**.
- Validated automated classification pipelines against manual annotation with faculty researchers, ensuring accuracy across behavioral pattern comparisons.

Software Engineering Intern — June 2023 – March 2024
HSK Technologies Inc. — *Newark, NJ*

- Integrated **15+ third-party APIs** and built **5+ ETL pipelines**, cutting data-ingestion failures by **20%**.
- Developed **50+ Python automation scripts**, saving an estimated **20+ hours/week** of manual work and speeding recurring workflows by **40%**.
- Built monitoring dashboards and automated tests to track pipeline health and catch data-quality issues pre-ingestion.

Projects

Stride | *Electron, Node.js, Strava API, Anthropic API (Claude), Garmin MCP* — July 2026
Founder

- Built a **Mac Electron app** pulling live **Strava**/**Garmin** data into a coaching dashboard with an **AI coach** (**Claude**) grounded in real pace, HR zone, and recovery data via a custom **Garmin MCP** server.
- Used the app's insights to cut **46 minutes** off half-marathon time in **5 months** (2:58:00 → 2:12:58).
- Encrypted **Strava** and **Anthropic** credentials locally via **macOS Keychain**, keeping all training data on-device except direct API calls.

EcoFin Carbon | *TypeScript, JavaScript, Tailwind CSS, Gemini, Nessie API, Vite* — October 2025
Lead Developer

- Built an **AI-powered** fintech app estimating carbon emissions from spending using the **Capital One Nessie API**.
- Led frontend development across dashboards and user flows; won **1st Place HackTX 2025** and **$1,000**.
- Integrated **Google Gemini** to generate personalized sustainability insights from user spending patterns.

BudgetCents | *Python, Flask, React, Stripe, SQL, Git* — November 2024
Lead Frontend Developer

- Built a full-stack finance app with **Flask**, **React**, Chart.js dashboards, and **Stripe** payment integration, with SQL-backed expense tracking.
- Designed budget-tracking analytics dashboards; won **1st Place HackFin 2024** and **$400**.
- Implemented **Stripe** webhooks and a SQL schema for automated transaction categorization and budget alerts.

Achievements & Interests

- **2x Hackathon Winner** (**1st**, HackTX 2025 & HackFin 2024; over **$1,400** in prizes)
- BPA Top **3** National Finalist, Business and Stock Simulation.
- **Interests:** FinTech Infrastructure, Backend Engineering, Distributed Systems, Machine Learning, Fitness, Running.
